1. The **Eco Club of PSG iTech** organized a visit to the RO (Reverse Osmosis) Purification Plant at PSG iTech on 13 October 2026.
2. Around **40 first-year female active members** of the Eco Club participated in the visit.
3. The students learned about the basic functioning of the **RO water purification system.**
4. They gained awareness of the different stages involved in **water purification and the removal of impurities**.
5. The visit highlighted the **importance of clean drinking water,** water conservation, and sustainable water management.
6. The visit was informative and helped the students understand **the role of water purification** in protecting public health and the environment.

"Every drop of water is precious; protecting it today means preserving life for tomorrow."
